Report of the Board of Education.

The Board of Education submits the following report for the year ending March 1, 1894.

Whole number of children between the ages of five and fifteen years, as enumerated by the Selectmen April 1, 1893, 96 ; boys 54 ; girls 42.

Whole number of scholars five years of age and upwards, who have attended school in town during the year, 106.

As a school board it has been our aim and desire as far as possible to procure teachers who are thoroughly competent to instruct our pupils. Nearly all the teachers for the past year have had experience in teaching and have used this in teaching their scholars not only lessons from text books, but also lessons that will be of practical use in the school of life.

For various reasons there has been a smaller attendance in most of the schools during this year than the last, but we think that good progress has been made by those who have attended.

We wish that all of our boys and girls would realize the amount of care as well as money, that is expended upon the schools every year, and the importance of improving the opportunity for education thus afforded them. Should they do so we think there would be no need of repeating our desire for regular attendance.
